SG 19.5 Asymmetric

Pyramid technology is the culmination of years of research, observation, core and coverstock analysis. With ever changing variables within the sport of bowling, (e.g., lane conditions, ball speed, rev rate) this technology allows any bowler, from stroker to two-handed, to achieve peak performance on medium to heavy oil conditions.

Pyramid is excited to introduce their first High Performance Hybrid bowling ball. The Dark Path. Starting at the core of the ball, Pyramid Bowling wanted to offer a versatile ball motion for different bowler styles as well as varying lane conditions.

We started by using our proven SG 19.5 Asymmetric core from the Chosen Path series. This core offers a wide variety of drilling options, whether you drill the ball to go long and hook hard or drill the ball strong roll and a strong backend, the combination of the SG 19.5 core and the GPS Navigational coverstock will take your game to the next level.

High Performance (8)

Factory Finish: 2000 Grit Abralon

Flare Potential: High

Coverstock: GPS Navigational Hybrid

Lane Condition: Medium
