

Pyramid technology is the culmination of years of research, observation, core and coverstock analysis. With ever changing variables within the sport of bowling, (e.g., lane conditions, ball speed, rev rate) this technology allows any bowler, from stroker to two-handed, to achieve peak performance on medium to heavy oil conditions.

Pyramid is excited to introduce their second Mid Performance bowling ball. The Path Origin Pearl. Starting at the core of the ball, Pyramid Bowling wanted to offer a versatile ball motion for different bowler styles as well as varying lane conditions.

The SG 19.5 Symmetric core offers a wide variety of drilling options, whether you drill the ball to go long and hook hard or drill the ball strong roll and a strong backend, the combination of the SG 19.5 core and the Path Reactive coverstock will take your game to the next level.

Advanced Performance(6)

Factory Finish: 1500 Grit Abralon/Factory Polish

Flare Potential: Medium

Coverstock: Path Reactive Pearl

Lane Condition: Medium
