

DETAILED DESIGN. PRECISE PERFORMANCE.

The Pyramid Blueprint Pearl is the follow up to the highly successful Blueprint Solid. We took the proven SG 19.5 core from the original Blueprint and added it to the Blueprint Pearl. This core offers high flare for maximum performance on the backend of the lane.

We also used the GPS Navigational coverstock from the original Blueprint and pearlized it. The addition of the pearl additive gives the Blueprint Pearl increased length and better energy retention. The Blueprint Pearl goes longer than the original, with a sharper and stronger backend reaction. This is perfect for when you move inside and need the ball to create enough angle to carry the corner pins.

The Pyramid Blueprint Pearl has been precisely designed to elevate your performance on the lanes.

Color: Blue/Sky Blue Pearl

Coverstock: GPS Navigational Pearl

Finish: 2000 Grit Abralon/Factory Polish

Core: SG 19.5 Symmetric

Lane Condition: Medium - Heavy

Weights: 12-16 lbs.

BLUEPRINT PYRAMID PROJECT 1.618

RG: 2.53 Diff: 0.050

Flare Potential: High (5-6")
