

STELLAR COLLISION

Create a stellar collision with the all new Pyramid Blunt Force.

Blunt Force features the SG Precessional Asymmetric core from the original Force. The largest and most dynamic core in Pyramid history is back to offer a devastatingly strong but controllable hook on medium to heavy oil conditions.

Paired with the GPS Navigational Hybrid coverstock, finished at 2000 grit Abralon with Factory Polish, the Blunt Force will provide an extremely strong but predictable ball reaction. Don't be afraid to adjust the surface finish though. Add polish and you'll see more length with a sharper backend reaction. Sand the coverstock to 1000 or even 500 grit and you'll be able to handle any amount of oil.

Get ready to collide with high scores with the Pyramid Blunt Force.

Color:	Orange Pearl/Black
Coverstock:	GPS Navigational Hybrid
Finish:	2000 Grit Abralon/Factory Polish
Core:	SG Precessional Asymmetric
Lane Condition:	Medium - Heavy
Weights:	12-16 lbs.
