

HIGH SCORES ARE INFECTIOUS

Pins should avoid direct contact. High scores are spreading rapidly due to the Pyramid Pathogen.

The newest addition to the Pyramid Advanced performance (6) line is the Pathogen. We set out to design the perfect benchmark reaction which can survey the lane and allow you to find the proper angle to the pocket.

After testing, we determined that two of our staples were the best options to achieve the desired reaction. On the inside, the New Era 139 Symmetric Core from our Path Rising line allows the Pathogen to read all parts of the lane with consistency and predictability. We've paired this with the GPS Navigational Solid coverstock from the Blueprint, finished at 2000 grit with Factory Finish polish. The combination provides great length with a smooth and controllable reaction on Medium oil.

This combination is deadly.

Color:	Lime Green
Coverstock:	GPS Navigational Solid
Finish:	2000 Grit Abralon/Factory Polish
Core:	New Era 139 Symmetric
Lane Condition:	Medium
Weights:	12-16 lbs.

PATHOGEN

RG: 2.54
Diff: 0.032
Flare Potential: Medium (3-4")
