

# THE INFECTION IS SPREADING

The infection is spreading. Scores are at an all-time high due to the Pyramid Pathogen X.

The original Pathogen strain has mutated, creating a ball with an even stronger backend reaction. The addition of orange pearl to the GPS Navigational coverstock allows the Pathogen X to retain energy for a devastating skid/flip ball motion.

The nucleus of the ball hasn't changed with the New Era 139 symmetric core again taking center stage. The core's medium RG and differential numbers, paired with the GPS Navigational Pearl, allow the ball to read the midlane before taking off on the backend. This is a unique quality for a pearl which all but eliminates over/under.

Start a plague on the pins with the Pathogen X.

Color:	Orange Pearl
Coverstock:	GPS Navigational Pearl
Finish:	2000 Grit Abralon/Factory Polish
Core:	New Era 139 Symmetric
Lane Condition:	Medium
Weights:	12-16 lbs.

RG: 2.54  
Diff: 0.032  
Flare Potential: Medium (3-4")
