SG Precessional Asymmetric

Pyramid technology is the culmination of years of core and coverstock analysis, research, and observation. With ever changing variables within the sport of bowling, (e.g., lane conditions, ball speed, rev rate) this technology allows any bowler, from stroker to two-handed, to achieve peak performance on medium to heavy oil conditions.

Blunt Force features the SG Precessional Asymmetric core from the original Force. The largest and most dynamic core in Pyramid history is back to offer a devastatingly strong but controllable hook on medium to heavy oil conditions. Paired with the GPS Navigational Hybrid coverstock, finished at 2000 grit Abralon with Factory Polish, the Blunt Force will provide an extremely strong but predictable ball reaction.

Pro Performance (10)

Factory Finish: 2000 grit Abralon
Flare Potential: High
Coverstock: GPS Navigational Hybrid
Lane Condition: Heavy
