SG 19.5 Dual Density Asymmetric

Pyramid technology is the culmination of years of core and coverstock analysis, research, and observation. With ever changing variables within the sport of bowling, (e.g., lane conditions, ball speed, rev rate) this technology allows any bowler, from stroker to two-handed, to achieve peak performance on medium to heavy oil conditions.

Long and strong or Skid/Flip - this is the reaction that most bowlers are seeking today. In more technical terms, they're looking to increase angle into the pocket. The Divergent Path Pearl creates angles that were once though unachievable. The Divergent Pearl uses the advanced SG 19.5 Dual Density Asymmetric core that was featured in the Divergent Path Solid. This Low RG/Medium Diff. core has made believers of the bowling world due to its overall strength and versatility.

Pro Performance (10)

Factory Finish: 2000 Grit Abralon/Factory Polish
Flare Potential: High
Coverstock: GPS Navigational ATX Pearl
Lane Condition: Heavy
